Ceramic Magic™

INTRODUCING AUTO MAGIC'S LATEST VALUE-ADDED INNOVATION

Ceramic Magic is a SiO₂ Ceramic, spray-on formula which is safe on all exterior surfaces. Ceramic Magic spray bonds to painted surfaces, providing a high gloss, water-resistant, and extremely durable finish.

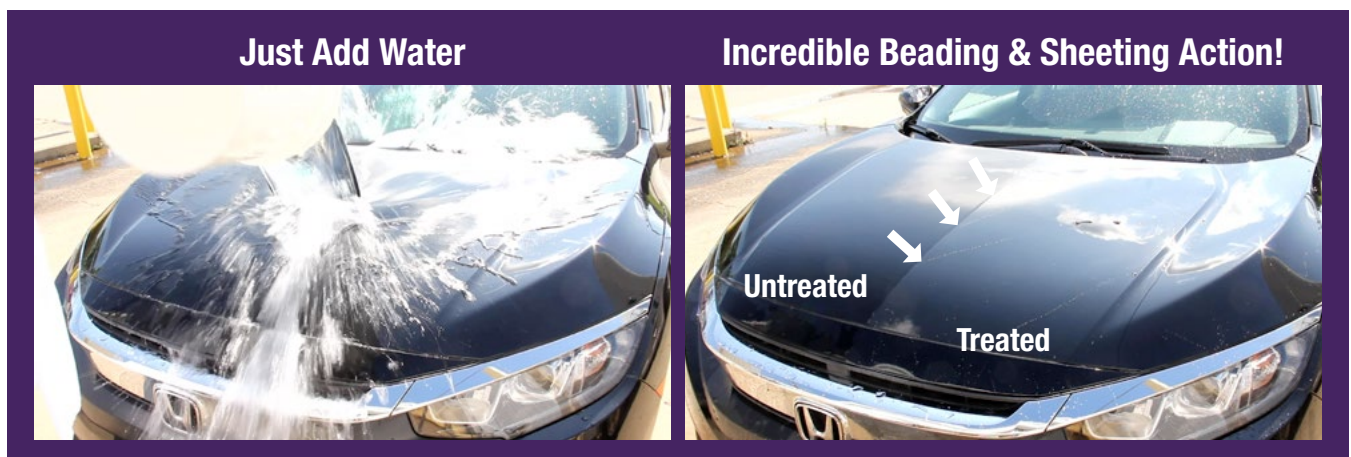

- Delivers a rich, crystal clear, reflective finish
- Extremely hydrophobic - repels water with incredible beading and sheeting action
- Resistance to UV and chemical exposure provides a durable shine that will last months
- Easy to apply - wipe on with a microfiber towel, then wipe off

45 – Ceramic Magic Gallon
4 gallons per case

PRODUCT INFORMATION

Product Description	Ceramic Magic is a fast-applying, highly hydrophobic SiO2 ceramic spray for use on exterior painted surfaces. Provides a protective and long-lasting finish to exterior painted surfaces. Nonabrasive. Easy to use; just apply a small amount to the surface, wipe on, wipe off.								
Directions	<ul style="list-style-type: none"> • Shake product well. Vehicle should be cool, properly cleaned and free of surface contaminants. • Working one panel at a time (large panels should be done in 3'x3' sections), lightly mist a small amount of product onto the surface. • Wipe product into the painted surface. • Buff to a high gloss with a second clean, dry towel. 								
Additional Uses	Excellent on RVs, motorcycles, bikes, and other painted surfaces.								
Helpful Tips	<p>Note: This product is a spray ceramic, not a traditional polymer or carnauba spray, so do not let the product dry on surface. Do not use in direct sunlight.</p> <p>Tip: After application, if you have haze, a smear or high spot, wiping the area with a damp/misted towel should eliminate the haze, smear or high spot.</p> <p>Recommendation: For best/longest lasting performance, do not wash the car for 4 hours after application of Ceramic Magic™.</p>

CLAY MAGIC INSTRUCTIONS FOR PAINT

- Step 1:** Make sure the vehicle is properly washed using a premium Auto Magic car wash soap. *See page 2*
- Step 2:** Form Clay Magic into a pancake shape, about the size of the palm of your hand.
- Step 3:** Spray Clay Magic Clay Lube onto a 3' x 3' section of the vehicle's painted surface.
- Step 4:** Clay the surface with Clay Magic. Use as much pressure as needed to lift the contaminants off the surface. If you drop the clay onto the ground, pinch off any dirt or debris. If the clay is too dirty to clean, discard it.
- Step 5:** Dry the area with a soft, clean terry or micro fiber towel. Repeat this process of "spraying & claying" to the entire vehicle. It's that easy. Your vehicle is now properly cleaned!

* The car pictured to the left was thoroughly washed, but after using Clay Magic, the remaining dirt on the surface was evident. Clay Magic really deep cleans and smooths the surface.
Don't polish or wax without it!
