- Excellent on new and old paint
- Extra heavy cutting
- High gloss finish
- Low dust
- Silicone free
- VOC compliant
- Body shop safe

# PC-1

## Product Technical Bulletin

501201: 32oz. Bottle

<b>Product Description</b>	PC-1 Rubbing Compound has been formulated specifically for paint finishing on scratch resistant surfaces including UV cured paints. This new technology replaces traditional compounds and polish/glaze systems to provide a quicker cut to level out 1500 grit sand marks and remove imperfections quicker and easier, while leaving a brilliant mirror-like gloss.								
<b>Directions</b>	<ul style="list-style-type: none"><li>• Shake well.</li><li>• Apply a small amount of product to the paint.</li><li>• Set Variable Speed Polisher to 1250 – 1500 RPM.</li><li>• Work in a 1½ square foot area and polish to high gloss.</li><li>• Remove any remaining compound residue with a soft clean cloth.</li><li>• Wipe carefully with a clean, soft microfiber cloth.</li></ul> <p><i>NOTE: Can be used with a foam polishing pad at 1200 – 1400 RPM for a final finish.</i></p>								
<b>Surface Applications</b>	OEM paints, repainted or refinished, lacquers, clearcoats and single stage paints. Also for use on waterborne or high solids paint.								
<b>Additional Uses</b>	Marine gel coats, plastic headlight covers, plexiglass surfaces.								
<b>Helpful Tips</b>	Clean compounding pads frequently. Remove compound residue with clean terry or microfiber cloth.
