### SECTION 4: First aid measures

#### 4.1 Description of first aid measures:

**Inhalation:**

Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen. If not breathing, give artificial respiration and have a trained individual administer oxygen. Get medical attention immediately. If the victim has stopped breathing open airway, loosen collar and belt, and administer artificial respiration. Keep the victim warm and quiet.

**Eye contact:**

Flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention.

**Skin Contact:**

Wash with soap and water. Get medical attention if irritation develops or persists. Wash clothing before reuse. Remove contaminated clothing and continue flushing with water.

**Ingestion:**

Do not induce vomiting and seek medical attention immediately. Drink two

glasses of water or milk to dilute. Provide medical care provider with this SDS. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into lungs. If possible, do not leave individual unattended. If individual is drowsy or unconscious, do not give anything by mouth; place individual on left side with head down.

Causes skin irritation. Causes serious eye irritation. Suspected of damaging the unborn child Causes damage to organs. Causes damage to organs through prolonged or repeated exposure.

IF exposed or concerned: Call a POISON CENTER/doctor.

### SECTION 5: Firefighting measures

**5.1 Extinguishing media:**

**Suitable extinguishing media:**

Use alcohol resistant foam, carbon dioxide, or dry chemical extinguishing agents. Water may be ineffective but water spray can be used to extinguish a fire if swept across the base of the flames. Water can absorb heat and keep exposed material from being damaged by fire. Regular foam

**Unsuitable extinguishing media:**

No data available

**5.2 Special hazards arising from the substance or mixture:**

Vapours may be ignited by sparks, flames or other sources of ignition if material is above the flash point giving rise to a fire (Class B). vapours are heavier than air and may travel to a source of ignition and flash back.

**Hazardous Combustion Products:**

Carbon dioxide, Carbon monoxide, Styrene oxide, Hydrocarbons

**5.3 Advice for firefighters:**

Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapours and decomposition products. Wear a self contained breathing apparatus (NIOSH approved) with a full face piece operated in the positive pressure demand mode with appropriate turn-out gear and chemical resistant personal protective equipment. Water may be used to cool closed containers to prevent pressure build-up and possible auto ignition or explosion when exposed to extreme heat.

### SECTION 6: Accidental release measures

**6.1 Personal precautions, protective equipment and emergency procedures:**

**Non-emergency personnel:**

Non-emergency personnel should be kept clear of the area.

**Emergency responders:**

No health effects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found
