**The World's First Truly Pinhole-Free Premium Body Filler**  
Advanced formula developed to work with advanced waterborne  
and HAPS compliant basecoat / clearcoat coatings!

- *Pinhole-Free Formula!*
- *Designed for use under advanced waterborne and HAPS compliant basecoat/clearcoat coatings*
- *Improved talc and fillers for fast and easy sanding!*
- *Provides the ultimate in spreading and self-leveling!*
- *ZNX-7® technology for superior adhesion and featheredging on steel, galvanized steel and aluminum!*
- *Backed by Evercoat's*

**Limited O.E.M Warranty System!**

Available in: 119 Qt. • 120 Gal. • 121 3-Gal. Pail • 122 5-Gal. Air Pail

### PERFORMANCE FEATURES, ADVANTAGES AND BENEFITS:

- **Pinhole-Free formula!** *Rage® Xtreme™* is the first truly pinhole-free premium lightweight filler in the market! *Rage® Xtreme™* is formulated with advanced air release agents and self-leveling properties that, when mixed and applied properly, allow entrapped air to migrate to the surface and release. Combine this technology with our vacuum mixing, processing and packaging, and watch the painter become your best friend!
- **Easy spreading formula** self-levels to provide a smooth surface that is free of voids, making *Rage® Xtreme™* easy to shape and work!
- **Easiest sanding premium filler!** *Rage® Xtreme™* uses improved talcs and fillers to provide easy sanding! After knocking down the high spots with 40 grit (if necessary) it easily shapes and finishes with 80 grit sandpaper.
- **Excellent vertical hang!** *Rage® Xtreme™* self-levels without losing its ability to hang on vertical surfaces. Use up to 1/4" on vertical panels without sagging!

### TECHNICAL FEATURES, ADVANTAGES AND BENEFITS:

- **Formulated to work under advanced waterborne and HAPS (Hazardous Air Pollutants) compliant coatings!** *Rage® Xtreme™* is developed with unique resins that offer much higher cross-link density, providing excellent resistance to absorption to the slower and often more aggressive solvents used in today's compliant coatings. This reduces the risk of swelling, shrinkage, and cracking. This also helps to improve the quality of the finish by allowing these solvents to release sooner from the coating, resulting in reduced risk of solvent pop and die back! *Rage® Xtreme™* is the first filler developed specifically for use under these advanced coatings systems!
- **ZNX-7® technology** quickly provides superior adhesion to steel, galvanized steel and aluminum much sooner in the repair, ensuring faster and easier sanding without the risk of pulling back the feather edge and having to re-apply filler!
- **Reduce repair time and material costs!** *Rage® Xtreme™* becomes dimensionally stable much earlier in the repair, allowing the technician to sand the filler sooner without sandpaper clogging. This also allows it to be primed sooner without the risk of solvent penetration. Solvent penetration into body filler can be harmful and may lead to potential cracking, swelling or shrinking of the repair! This makes *Rage® Xtreme™* a superior product to use in high velocity repair cycles where cycle time and productivity are critical!

Part No.	Size	Units/Case
100120	1 Gallon	4
100121	3-Gallon Pail	1
100122	5-Gallon Air Pail	1
