PRODUCT NAME:

Clay Magic® Glass Cleaning Clay Kit

PART #:

88700
(Polymer Clay)

PACKAGE:

50 gram bar

PRODUCT CATEGORY:

Surface Preparation

COLOR:

Lavender

SCENT:

N/A

ABRASIVENESS:

0.5 out of 10 (10 is highest amount of abrasive)

PRODUCT DESCRIPTION:

This new kit contains a 50 gram glass cleaning clay bar, and super-concentrated glass cleaner and clay lubricant in one. Removes dirt, road film, bugs, tree sap, industrial fallout, and water spots quickly. Get better visibility. Rain will sheet easily after use. Also prolongs your wiper blades. Super-concentrated glass cleaner makes up to 32 oz of product.

DIRECTIONS:

Mix the super concentrated glass cleaner with up to 32 oz. of water in a spray bottle and spray onto the glass in a 2'x2' section of a clean, cool and dry glass surface. Form Clay Magic® Perfect Vision Glass Cleaning Clay into an oval shape. Gently rub the clay bar over the area using a back-and-forth motion in 5 to 6 passes. Wipe the surface dry. To clean the clay bar, simply fold it in half and reshape into an oval shape. Store the clay bar in a clay container or plastic baggie with a light spray of glass cleaner mixed previously. **DISCARD BAR IF DROPPED ON THE GROUND.**

SURFACE APPLICATIONS:

It can also be used on glass, chrome, fiberglass, plastic, and many other smooth hard surfaces for contamination and paint overspray removal.

HELPFUL TIPS:

Always make sure the surface you intend to clay is thoroughly washed, dried, and cool. Fold the clay frequently to ensure clean clay is used. It is best to fold the clay after each main body panel is completed. Most of the contamination removal is going to be on the upper portions of the vehicle (above the side moldings). Do not use clay without a clay lubricant. The lubricant helps glide the clay and loosen imbedded surface debris. Do not use the clay if dropped on the ground. This collected dirt may add surface scratches.
