

Technical Data Sheet

PRODUCT NAME:**BC-2®****PART #:****78A****78****PACKAGE:**

6 - 16 oz.

4 - 1 Gallon

PRODUCT CATEGORY:

Waxes & Polishes

COLOR:

Light Pink

SCENT

None

ABRASIVENESS:**3** out of 10 (10 is highest amount of abrasive)**PRODUCT DESCRIPTION:**

BC-2® is an all-in-one polishing compound designed to remove light to medium paint defects while leaving behind a slick waxed surface with lasting protection for up to 90 days. This all-in-one polish will quickly and easily remove swirls, imperfections and light scratches while leaving a deep glossy finish. BC-2 offers a long working window and a dust-free application. This can be applied with an orbital, rotary or by hand with a variety of wool and foam pads or microfiber applicators. BC-2 features easy removal and can be applied to a full vehicle before wiping off.

DIRECTIONS:

Shake well. For hand application, use a wax applicator in overlapping, circular motions. Allow to haze, then remove with a soft, microfiber or terry towel. Apply 4 medium sized drops of polish to pad and work in a crosshatch pattern until the compound turns from opaque to clear in a 2'x2' section. To ensure maximum protection, allow the product to flash or dry on the surface before removing with a microfiber (entire car may be polished prior to removal). If using an orbital polisher, apply at a low-speed setting, then buff at setting 5-6. If using a rotary polisher, apply at slowest speed and then buff between 1,200-1,400 RPM. If working by hand use a clean, soft applicator for best results.

SURFACE APPLICATIONS:

For high gloss and added surface protection of clear coat, single stage, acrylic, lacquers, enamels, as well as powder-coated paints.

ADDITIONAL USES:

Excellent on RVs, boats, motorcycles, bikes, and other painted surfaces.

HELPFUL TIPS:

It is best to remove all surface contamination with the use of detailing clay prior to application to ensure the highest performance of #78. This will also ensure easier application and removal. Do not apply wax in thick layers. Rotate the towel as you remove the wax.

SAFETY & HANDLING:

Safety Data Sheets can be found online at automagic.com

Use proper personal protection equipment when using chemicals

Frequently Asked Questions:

Q1. What happens if I accidentally let BC-2 dry on my car?

A1. No worries, BC-2 is a water-based formula and if need be, it can easily be removed with a damp cloth.

Q2. Can you apply BC-2 outside in direct sunlight if you do not have a garage to work in?

A2. Yes, BC-2 can be applied in direct sunlight. Just be sure to keep your panels clean as you do not want any debris to affect the buffing process. And to make the cleanup process easier, it is recommended that you complete one panel at a time when working in direct sunlight.

Q3. What is the best type of pad to use with BC-2?

A3. There are many options when it comes to pairing a pad with this product. You can use wool, foam, or microfiber pads.

Q4. What if BC-2 does not seem to be removing all the scratches and imperfections I want it to?

A4. This product is designed for light correction and polishing to refine paint. If your paint is heavily swirled or has deeper scratches, use a compound such as 87 XP Compound or 110 Power Cut Plus prior to using BC-2.
