IMPORTANT INFORMATION

- **SAFETY:** Auto Magic® would like to remind you to take the necessary safety precautions and to use the properly rated PPE (Personal Protective Equipment) to protect yourself during these and all procedures. When working with chemicals and reconditioning products, such as those mentioned in this Auto Magic brochure, please reference OSHA's Hazard Communication Standard 1910.1200. The OSHA Hazard Communication Standard's purpose is to communicate hazard information to employees so they can work safely and will aid employers in implementing a hazard communication program, including labeling, safety data sheets, and employee training.
- **CAUTION:** When dealing with a matte or flat finish, contact the vehicle manufacturer for the recommended products and procedures. These finishes are different from other automotive high-gloss paints. Most typical automotive finishes have a clearcoat finish that reflects light and gives a glossy appearance. A matte finish uses a clearcoat that diffuses light, providing a "matte" or "satin" finish. Avoid the use of products that contains abrasives, waxes, or silicone as these materials will damage the finish. Do not use Clay Magic® on matte finishes.

Auto Magic

Professional Car Care By EVERCOAT®

TRUADVANTAGE™ SYSTEM

TRUADVANTAGE™ SYSTEM

The Auto Magic TruAdvantage™ system is an efficient all-in-one dilution system offering seven ultra-concentrated products at the push of a button. TruAdvantage™ eliminates guesswork, lowers the detailing cost per car, provides consistent showroom results, and reduces chemical handling waste and cost.

TRUADVANTAGE™ CONCENTRATES

A dilution solution for each step of the detailing process

Auto Magic's TruAdvantage™ highly-concentrated products are made up of seven must-have formulas that are perfectly mixed every time, with just a push of a button.
