IMPORTANT INFORMATION

- SAFETY: Auto Magic® would like to remind you to take the necessary safety precautions and to use the properly rated PPE (Personal Protective Equipment) to protect yourself during these and all procedures. When working with chemicals and reconditioning products, such as those mentioned in this Auto Magic brochure, please reference OSHA's Hazard Communication Standard 1910.1200. The OSHA Hazard Communication Standard's purpose is to communicate hazard information to employees so they can work safely and will aide employers in implementing a hazard communication program, including labeling, safety data sheets, and employee training.
- CAUTION: When dealing with a matte or flat finish, contact the vehicle manufacturer for the recommended products and procedures. These finishes are different from other automotive high-gloss paints. Most typical automotive finishes have a clearcoat finish that reflects light and gives a glossy appearance. A matte finish uses a clearcoat that diffuses light, providing a "matte" or "satin" finish. Avoid the use of products that contains abrasives, waxes, or silicone as these materials will damage the finish. Do not use Clay Magic® on matte finishes.

Auto Magic
Professional Car Care®

ADVANCED PAINT
CORRECTION TECHNOLOGY™

Auto Magic's Paint Correction System is an advanced system incorporating micro-abrasive technology that cuts through paint imperfections and defects, restoring the surface to like-new condition.

ADVANCED PAINT CORRECTION SYSTEM

For each step of the detailing process

Auto Magic's Paint Correction System is all you need to create an unforgettable, professional finish – and it's completely body shop safe!

- Complete system with products that can be used on their own or as a system to achieve a high-gloss, swirl-free, and a low-dust finish
- Corrects paint imperfections like surface scratches, acid rain, oxidation and swirl marks
- Produces the highest gloss while compounding
- Can be used with both a rotary or DA polisher
- Body Shop Safe with no compromise on performance

STEP 1

PC-1™ Extra Cut Compound is an advanced, extra cut compound that delivers a high-gloss and low-dust finish for step one. It can be used in multiple paint correction scenarios and is versatile with industry equipment*, rapidly taking out 1500 grit sand scratches and finer.

#501201 - 1 Liter Bottle
#710100 - Wool Pad
#710600 - White Foam Cutting Pad

STEP 2

PC-2™ Advanced Diminishing Compound is an advanced, diminishing compound that works remarkably fast, removing any residue and possible swirl marks left behind from step one. It also rapidly removes 2000 grit sand scratches and other paint imperfections while producing rich color depth, high-gloss and a swirl-free finish.

#501202 - 1 Liter Bottle
#710700 - Burgundy Foam Polishing Pad

STEP 3

PC-3™ Final Finish is a final finishing polish that revives the original beauty to all painted surfaces. PC-3 easily adds intense color depth with a spectacular high-gloss finish.

#501203 - 1 Liter Bottle
#710800 - Black Foam Finishing Pad
